EDUCATION

Air University Islamabad, BSIT

Sep-2023 to 2027

4th Semester

Highest Achiever of Batch S-24 (2nd Semester)

2nd Highest Achiever of Batch F-23 ()

PROJECTS

Service Provider App With MYSQL

- A C++ project that connects customers with workers (e.g., electricians, plumbers) based on location.
- Uses MySQL for storing and retrieving user and worker data.
- Supports login/registration, worker listing, and assigning tasks.
- Demonstrates integration of file handling and basic database operations in C++.

TASK MANAGEMENT SYSTEM ON MERN

- A responsive MERN (MongoDB, Express, React, Node.js) web app for creating, updating, and deleting tasks.
- Includes user authentication and session management.
- Users can track task status (pending, in progress, completed).
- Designed for personal productivity and team task handling.

Reverse shell

- A Python-based reverse shell tool for remote access/control.
- The client connects back to the attacker's server, enabling command execution.
- Implements socket programming and basic encryption for data transfer.
- Useful for demonstrating ethical hacking and cybersecurity practices (for educational use only).

SKILLS
